

Live Scheduling Tracker — How to Use

GH Logistics · Memphis RPDC · tour coverage & weekly reporting

Open the tracker: <https://andrewgh99.github.io/Live-Scheduling-Tracker/> — works on any phone or computer, nothing to install.

What it's for

Confirm FTC coverage across the **3 USPS tours × 7 days**, see exactly where staffing is short against the SOP station-priority model, then **finalize the week and export ONE standalone report**. The goal is a finished, shareable weekly report — not a tracker you must keep open forever.

The 5-step weekly process

1 — Load the roster	On the Roster tab: connect the shared Google Sheet (paste its link once, then hit Refresh whenever someone is hired or quits), drag in an INPUT_TEMPLATE.xlsx , or edit cells directly. Each person's day cells are their confirmed availability — fastest entry is the dropdown: Off / Tour 1 / Tour 2 / Tour 3 / Avail.
2 — Review coverage	On Board & Gaps , read the 3-tours × 7-days grid. Colors show how many of the 4 stations are manned. The Gaps table lists every slot below 4 bodies, worst first — that is your hiring / shift-move punch list.
3 — Finalize each day	Click a day chip once its coverage is locked (or Finalize all 7). The counter tracks progress to 7/7 — you walk the week deliberately, day by day, instead of person by person.
4 — (Optional) Monitor live	During a shift, the Live Now tab auto-detects the current tour. Toggle who is physically on; anyone scheduled right now but not toggled on is flagged GAP in red.
5 — Export the report	Click Export Weekly Report . You get one self-contained HTML file — open, print, email, or post it. It needs nothing installed and freezes the finalized week as a snapshot.

Where things live

App & files: <https://github.com/AndrewGH99/Live-Scheduling-Tracker>

The **Google Sheet** (maintained by HR) is the single source of truth for who is on the roster. The **exported report** is the shared record of the week. Edits and finalized days save automatically in your browser.

Reference — tours, stations, colors

Why the board shows what it shows

The 3 USPS tours

Tour	Window	Kind
Tour 1	11:00 PM – 6:00 AM	overnight
Tour 2	6:00 AM – 2:00 PM	day
Tour 3	2:00 PM – 10:00 PM	evening

A person counts toward a tour when their hours cover at least **half** of it. “Avail.” (the 24/7 lead) counts toward every tour.

The 4 stations — filled in this priority order (SOP)

#1 • Inside/Outside Floor Lead	ALWAYS staffed 24/7/365. Interior floor + exterior docks, first responder, driver badging / PPE / check-in. The one station that can never be empty.
#2 • Outside Docks	Continuous dock patrol, hourly chock + trailer audits, meets every arriving truck, strap collection, driver-compliance fines, trucks unhooked & sealed before departure.
#3 • Trailer Yard / Inbound	Inbound trailer inspection (four-photo process), running yard inventory/audit, out-of-service flags, daily technician check, trailer moves.
#4 • Overflow / Support	Activated only when a 4th body is available. Backs up #2 & #3, carrier hunting, trailer decaling, owns the 3 PM / 3 AM reactivated-trailer list.

What the colors mean (bodies on a tour → stations manned)

Color	Bodies	What it means
GREEN	4+	All 4 stations manned — full operation with Overflow/surge capacity.
YELLOW	3	#1 · #2 · #3 covered; Overflow (#4) down. Core ops fine, no surge.
ORANGE	2	#1 · #2 only. Trailer Yard/Inbound unmanned — inbound inspection at risk.
RED	1	Floor Lead only; docks unmanned. Critical single point of failure.
BLACK	0	No one on the tour — breaches the 24/7 Station #1 mandate.

Baseline = **4 bodies per tour** (all four stations covered). The Gaps table lists every tour × day below baseline, worst first.

Filling in hours — accepted formats

You type / pick	Meaning
Off (or leave blank)	Not working that day
Tour 1 (11p–6a) / Tour 2 (6a–2p) / Tour 3 (2p–10p)	Works that full tour — pick from the dropdown
Avail.	24/7 lead — counts toward every tour
9a–6p · 10p–8a · 6:30a–3p	Exact hours (overnight handled automatically)
10–11p / 8–9a	Split shift — separate segments with a slash

Questions or roster changes: contact the scheduler / Accountability Manager. HR updates the shared Google Sheet; everyone else just hits Refresh.
